

# THE GLEICHEN CALL

VOLUME XXVIII

NO. 50

GLEICHEN, ALBERTA, WEDNESDAY FEBRUARY 27, 1935

SUBSCRIPTION \$2.00 PER YEAR

## BORAD OF TRADE APPOINT COMM. FOR ENSUING YEAR

A very enthusiastic meeting of the Board of Trade was held in the Community Hall. When plans for the ensuing year were discussed.

One of the first events to be sponsored by the Board this year is an exhibit of handicrafts which will take place early in the month March. During 1934 an exhibit of art was sponsored to which all surrounding schools were invited.

Mr. Hartley reported on the work of the committees charged with the responsibility of securing candidates for the town council. He stated that Messrs. McKay, Thompson and McConnell stood for re-election and J. E. Ostrander was nominated mayor and elected by acclamation. The newly-elected member for the school board was present. O. Lindquist, while Messrs. Farquharson and Harrison were returned to the board.

John Boyd reported on the progress of the library committee, stating that new shelves had been built to house the increased number of books.

The improvement of the Arrowwood highway was again discussed and a letter reminding the local member, J. C. Buckley, of the much needed improvements was to be sent to Edmonton.

Upon a request made by James Black, the Board of Trade is again supporting the Drumheller festival representation from Gleichen with a financial donation. There are two shirts to be sent there as well as solid performers. A sum of \$25 was voted for this purpose.

A tree program will again be carried out during 1935 and the committee in charge will report at the March meeting just what plans could be followed. The beautification of the school grounds and the cemetery was considered.

The nominating committee present a slate of committee to be elected for the ensuing term resulting in the following appointments:

Treasure planting and auto camp committee: Messrs. Yates, Purcell and Lester. Boy Scouts: A. F. MacCallum, Publicity; Goodehner, Sutherland, Evans, Industrial: Robertson, W. Schmidt, and McKay. Horticultural P. Kelley, C. Johnston R. A. Brown and James Black. Entertainment: Pinney, McKay, Michael, S. Haskayne, F. Jones, Eggle. Library: Boyd, Gorill, and Sutherland. Membership: Hartley, Purcell, Boyd. Old Timers: Dafos, Goodehner, Yates, Evans and Davis. Wilson's Roads: Black, Boyd, Dafos. Nominating Committee: Purcell and MacCallum.

At the regular March meeting all members of the Board of Trade and their wives will be invited to join in a social evening. A lecturer will address the gathering, a short business meeting will be held, which events will be followed with a lunch or supper and some form of program.

## THE WEEK AT OTTAWA

(By F. W. Gershaw)

On Monday the ringing of the dinner bell called for a recorded vote on the second reading of the Unemployment Insurance Bill. The result was a vote of 101 to 9 in favor of the Bill. Mr. Bennett admitted that almost all jurists, including himself, had always held that social legislation came under provincial jurisdiction but now he had changed his mind. In spite of the B.N.A. Act, he stated that the Dominion had made a treaty or convention at Galt in 1919 endorsing unemployment insurance. This created an obligation and gave the party making the treaty the power to carry it out.

If there is a conflict between the Dominion and any province the Dominion has the right of way. As this is a taxation measure and the Dominion has the right to impose any tax therefore, they can apply this measure. These reasons induced the Government to assume the power of putting the act on the statute book.

The average member feels that there should be uniformity in an act of this kind and as it would be perhaps impossible to get all the provinces to agree on a uniform plan it should on that account be operated by the Dominion.

Clerks in stores, employees in flour mills, industry, garages and

## MAYOR OSTRANDER OCCUPIES CHAIR FOR FIRST TIME

Last week at the council meeting our new mayor, J. E. Ostrander, was sworn in. Mr. Ostrander with councillors Wm. McConnell, W. J. McKay and Chas. Thompson took their oath of office.

Copies of the proposed new franchise had been received from the Calgary Power Co. The secretary was instructed to write the Company enclosing a copy of the resolution passed at the special meeting of ratepayers for the purpose of discussing the franchise and get their reply there-

A discussion too place regarding the opening of a road from the main highway to the school yard, but nothing definite was decided on, as the school board was looking into this matter.

A statement of the Community Hall was submitted by the secretary, from the date the hall was taken over by the town to December 31, 1934. This statement showed that all debts and running expenses had been paid leaving a credit balance of \$96.

The regular meetings of the council will be held on the first Monday of each month. A. F. MacCallum was elected deputy mayor for the first three months. The usual banking authority was given to the Bank of Commerce. L. J. Lester & Sons, Inc., were appointed auditors for 1935. Dr. G. H. Farquharson was appointed medical health officer. Mr. Murray was appointed assessor for 1935. The board of health will consist of Dr. Farquharson, L. Michael, R. S. McQueen and R. A. Brown. Dr. Barlow and J. E. Lester are also on the board. The regular meetings of the council will be held on the first Monday of each month. A. F. MacCallum was elected deputy mayor for the first three months. The usual banking authority was given to the Bank of Commerce. L. J. Lester & Sons, Inc., were appointed auditors for 1935. Dr. G. H. Farquharson was appointed medical health officer. Mr. Murray was appointed assessor for 1935. The board of health will consist of Dr. Farquharson, L. Michael, R. S. McQueen and R. A. Brown. Dr. Barlow and J. E. Lester are also on the board.

Upon a request made by James Black, the Board of Trade is again supporting the Drumheller festival representation from Gleichen with a financial donation. There are two shirts to be sent there as well as solid performers. A sum of \$25 was voted for this purpose.

Membership: Hartley, Purcell, Boyd. Old Timers: Dafos, Goodehner, Yates, Evans and Davis. Wilson's Roads: Black, Boyd, Dafos. Nominating Committee: Purcell and MacCallum.

At the regular March meeting all members of the Board of Trade and their wives will be invited to join in a social evening. A lecturer will address the gathering, a short business meeting will be held, which events will be followed with a lunch or supper and some form of program.

## SCHOOL PUPILS TO ENTERTAIN IN HALL NEXT WEEK

Friday, March 8th, will mark the highlight of entertainment in the Community Hall for this season. On the date the public school is presenting an interesting and varied program. The program's a two-fold. As the Bassan Inspectorate Musical Festival has been discontinued due to the division of that inspectorate, and the inclusion of Gleichen in the Drumheller inspectorate it is physically impossible to take the same part in the Drumheller Festival as was done in the school competitions. So that the children might still profit by the musical and elocutionary training it is decided to prepare a representative number which might take part to the benefit of the parents and at the same time to provide funds by which the choir and competitors may be transported to Drumheller in the second week in March.

The expenses of the effort will be rather heavy, but the Board of Trade have made a grant to help out and the Board still hold a few dollars in hand. From last year, so the teachers hope to be able to secure enough from the concert to provide safe and comfortable transportation and supervision during the time the children are in Drumheller. Up to the present these ventures by the school have been entirely self-supporting and the School Board have not been asked for any financial assistance, although their moral support has been ungrudgingly afforded.

The idea behind all this is that children shall get accustomed to appearing before the public to give of their talents and that all shall benefit by a training in musical or some other form of self-expression. The idea should be for every child in school to be able to appear on the platform at this, although it is the ultimate aim.

A varied program has been arranged including songs, recitations and dramatizations from the different songs along with contributions from the orchestra, Miss Michael, Mrs. Ward and a one act play directed by Mr. Pineau.

## JUVENILE HOCKEY DRUMHELLER AND GLEICHEN ACES

The Drumheller Juveniles and the Gleichen Aces clashed here Monday evening in the first round of the play-offs. Drumheller won by a 3-0 score. The game was played on a perfect sheet of ice which permitted great speed, and checking was very heavy. The score does not indicate the quality of the game but Drumheller was able to take advantage of the breaks in the game. Drumheller made two counters in the first. Number one was made by Stevenson and the second by Clark from Swain. Gleichen had many shots but were too anxious to score and shot wide of the net. The only penalty of the period was handed to Stevenson.

The second period saw the game speed up. Drumheller made the third and last counter of the game by Conlin on a long shot from just inside the blue line. Both teams got through on several occasions and only had the goalie to beat but these gents were on the alert and outgutted the puck carrier. Stevenson and Lasoski each sat in the penalty box for a short time, thinking it over.

The third saw Drumheller playing a three man defence, while Aces set the pace, but were unable to score. In this period as in the second both sides got through and only had the goalie to beat but could not budge him twice. On one occasion Drumheller had three on the gate past the defense but their speed and anxiety to score was so great they failed. Brooksby received two penalties during the period.

Drumheller line-up: Currie, Stevens, John Jordan, Gibson, Clark, J. Jordan, Swain, Morrison, Conlin, Brooksby, Hamilton, manager.

Gleichen Aces: Bogstie, Murray, Lasoski, W. Lester, Schnepp, Bud Lester, R. Desjardine, Bassarab, Hall Manager Milton Desjardine, Coach by McIlroy.

Referees: Bob Brown, Gleichen and Watson of Drumheller.

At Drumheller last night the Aces lost the round by a score of 3-1.

#### Beware The Danger Spots

The inauguration throughout Canada of new social services, and the extension of social services already existing, are policies to which it is now clear all political parties in Parliament are definitely committed. Since the beginning of the present century there has been a steady growth, not only in Canada but in all countries in the number and scope of these services of a social character, and it is now evident that the people of this Dominion are in favor of more and still larger and comprehensive services of this character.

This development is in line with modern trends and the new conception that all the people are responsible for the welfare of each individual citizen. We refer to this as a new conception, yet it was as old as civilization itself. Man is his brother's keeper and if and when man fails to discharge that responsibility to his fellowmen, then the very civilization which protects him will collapse. So it is that the great majority of people will be found to welcome the introduction and enlargement of a national programme of social services.

There are however, one or two danger spots in connection with such a programme, which the Canadian people will be well advised to recognize at the outset. These services are designed to be helpful to us as individuals and as a nation; let us therefore beware that they do not actually prove harmful.

The first danger to avoid is that in our enthusiasm and commendable desire to provide social services, and to establish them upon a generous scale, we do not overdo it, and embark upon programmes which may prove to be beyond the financial capacity of the Canadian people to maintain. Some services, such as old age pensions, other social services, unemployment insurance, free medical service, etc., will cost an enormous amount of money annually. Some of these services are already costing the Federal and Provincial Governments many millions of dollars, but present expenditures are undoubtedly small in comparison with the cost of proposals now being made.

Each and every one of these social services can be provided and made possible by just one method, and that is taxation. That is, the community as a whole must through the payment of taxes provide the money which will be distributed through one social service or another to the people who are entitled to receive it. This is the only way to see that the payment of old age pensions throughout Canada, then taxes which will yield fifty million in revenue to the government must be imposed and paid by the people. There is no other way. This fact must be recognized, together with the further fact that there will be limits beyond which people cannot pay taxes, and so some other service which depends upon government taxes beyond that limit will find itself in difficulty.

Once established, experience has proven that these social services grow very rapidly and that expenditures largely increase. This experience indicates a second danger spot. It is this: "So long as individual males and women are required to pay out of their own pockets for these services, they will, as a rule, work, exercise some degree of thrift, and save against sickness and old age. In a word, self preservation will be one of the guiding rules of their life. But once it becomes an accepted and established fact that public funds are paid out for welfare, there are two possibilities: that the community will care for them until the last ill, if and when they live, and the community will support them throughout their old age and bury them when they die—then there is grave danger that the incentive which is now the great driving force in our human nature will become less keen, weaker and gradually die."

#### QUICKEST METHOD TO RELIEVE A COLD

Follow Directions to Ease Pain and Discomfort Almost Instantly

When you have a cold, remember the simple treatment pictured here . . . prescribed by doctors everywhere today as the *quick, safe way*.

Because of Aspirin's quick-disintegrating property, Aspirin "takes hold"—almost instantly.

Just take Aspirin and drink plenty of water . . . every 2 to 4 hours the first day—less often afterward . . . If throat is sore, use the Aspirin gargle.

But be sure you get ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin Tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

2. Take 2 Aspirin Tablets.

3. Drink full glass of water. Repeat treatment in 2 hours.

4. If throat is sore, gargle and stir 1/2 tea-spoonful of a glass of water and gargle. This eases the soreness in your throat almost instantly.

#### Champion Bricklayer

Philip Lancaster, 24-year-old foreman in a brickyard at Hull, England, lays claim to the title of being the world's champion bricklayer. He laid 3,000 bricks in four hours, a record, he says. In the first hour he laid 908, a little better than 18 a minute.

#### HE FELT MISERABLE AFTER MEALS

#### Acute Indigestion Relieved by Kruschen

The treatment which put this man right must surely be worth trying in every case of indigestion. Read what he says:

"For years ago I suffered very much from indigestion, loss of appetite, and a most severe pain in my back. I had to give up my stomach, the most miserable aliment, and had no desire or appetite for them. A friend advised me to try Kruschen Salts. I did so, and I am most happy to say that after a short time I feel the same again. I continue taking Kruschen till I feel myself quite better and a new man. I feel light-hearted as I did twenty years ago."

What Kruschen did for him it will do for everybody else who suffers from indigestion as he did. The fact that the little dried dots of Kruschen just stimulate the flow of gastric juices to aid digestion, and then ensures a complete, regular and unfailing elimination of all waste matter every day.

#### New Gold Strike

#### Sensational Discovery On The North Shore Of Lake Athabasca

Three aeroplanes were busy flying crews, diamond drill equipment and supplies to what is hailed as a sensational new gold strike at Beaver Lodge, on the north shore of Lake Athabasca.

Already there are more than 200 men at the camp, hastily constructed, and more stalkers are on their way. Ten dog teams recently left Fort Chipewyan for the scene of the discovery.

All reports say that Beaver Lodge is the greatest gold discovery in Canada in many years.

#### TELLS EXPERIENCE BEFORE A NOTARY

Mrs. Alice Aubrey, 1605 Maisonneuve St., Montreal, recently gave sworn statement how Fruit-a-vives helped her health. She now enjoys life after years of poor health and, so you may be sure, she is a good example of her experience in a statement made under oath. She says: "I was troubled for years with dizzy headaches. I could not sleep, nor have appetite. I had no appetite. I had no sleep. It was difficult for me to do my work. I tried a great many laxatives, but found none that would help. One day I started taking Fruit-a-vives. In a very short time my health became greatly improved. I now enjoy life much more than ever before. I am a good example of the value of Fruit-a-vives."

Copy of Mrs. Aubrey's complete sworn statement will be given on request. Write to the manufacturer, OGDON'S FRUIT-A-VIVES—15c and 50c EVERYWHERE

#### Little Journeys In Science

##### COSMIC RAYS

(By Gordon H. Guest, M.A.)

Glass becomes negatively charged when rubbed with catskin, but positively charged when rubbed with silk. Also, a strip of celluloid becomes negatively charged when drawn between the fingers. In order to detect and measure the electric charge on any substance scientists have devised an instrument known as the electroscope. A simple type of electroscope consists of a bottle with a paraffin stopper through which runs a piece of glass tubing. Inside the tube the glass tube is a piece of brass or copper wire from which are suspended two strips of gold leaf. A ball made of cloth is attached to the other end of the wire and is of course, outside the bottle just above the paraffin stopper. Whenever the ball is given either a negative or positive charge the leaves will separate in proportion to the amount of the charge. A rubber comb rubbed on a cat causes leaves to become negatively charged and if it is combed against the tin foil ball some of this charge is imparted to the electroscope and the leaves will fly apart. Since the charge is negative, another negative charge will cause the leaves to spread still farther apart, whereas a positive charge will cause the leaves to fall together before again flying apart. In this way the kind of charges may be determined. When even the best of electrosopes are charged it is observed that the gold leaves slowly come together again. This means that some negatively charged particles from the atmosphere are neutralizing the charges on the leaves. Scientists set out to discover what was causing this discharge of an electroscope and found that it was due to certain rays which came to the earth from outer space. They are called cosmic rays.

Most attempts have been made to stop the natural leak or discharge of an electroscope. These attempts have always failed despite the use of the most perfect insulators and the protection of the electroscope by lead shields several feet in thickness. These experiments suggested that there exists an unusually penetrating radiation of feeble intensity.

Some attempts have been made to stop the natural leak or discharge of an electroscope to points near the two poles of the earth, at the equator, and at various other latitudes. Electrosopes and similar instruments recording devices have been sent up into the air in sounding balloons to altitudes of over 20 miles, and have been carried to altitudes of 25,000 feet by spherical balloons. Experiments have been taken to high mountains as well as to depths as great as 1,000 feet in lakes. All experiments show that the rays come from above the earth, and so they have been called cosmic rays. Outstanding among the various investigators in this work are two American scientists, Millikan and Compton.

Women are becoming efficient as English experiments show that insects are carried by gales.

#### DON'T RISK BAKING FAILURES . . .

"YOU CAN'T BAKE GOOD CAKE WITH INFERIOR BAKING POWDER. I INSIST ON MAGIC. LESS THAN 1¢ WORTH MAKES A BIG CAKE."

says MADAME R. LACROIX,  
Assistant Director of the Provincial Board of Domestic Sciences, Montreal.

MAGIC BAKING POWDER  
CONTAINS NO ALUM—This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

Canada's best known Cookery Experts and Dietitians warmly endorse using good ingredients to poor quality baking powder. They advise MAGIC Baking Powder for sure results!

CONTAINS NO ALUM—This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

Made in Canada

#### TELL YOU HOW TO COOK CAULIFLOWER without the neighbors knowing it

Wrap it in Canapar cookery parchment. Seal in the aroma, flavor and goodness all at once. Cook your boiled or steamed FISH in Canapar. Line your roasting pan with it. It prevents fats and juices from burning and makes the meat more tender.

Canapar saves fuel . . . improves food . . . and eliminates scraping and scouring of pots and pans. You can use Canapar over and over again. It will not absorb odors. It makes a wonderful dish cloth, being silky and very tough when wet. Doesn't shed lint.

## Doctors Have No Recourse

### Cannot Collect For Emergency Case If People Refuse Payment

The other day a citizen carried a man unconscious and bleeding from a street accident into the nearest doctor's office. The doctor probably saved the man's life and in doing so did not heed the spattering of his office furniture and his carpets with blood. But the patient will not pay, and there is no law to make him do so. He pays neither for the medical attendance he received nor for the household goods which were damaged. He was unconscious, incapable of making a contract, and the physician apparently has no recourse at law.

It is said that if a policeman, instead of a citizen, had carried the injured man into the office, the doctor could have secured a fee. Even for this there is no certain provision.

PROVED BY 2 GENERATIONS

### Thinks Meat Essential

#### In Diet May Cause Stammering States Doctor

AN INSTITUTE

An insufficiency of meat in the diet may be an important predisposing factor in a great many cases of stammering, according to Doctor Dunlap of Johns Hopkins University. He makes this surprising announcement after a study of many cases of child stammerers. Pediatricians and nutritional experts long have held the widely accepted belief that children should be given very little meat before they are six years old. In Doctor Dunlap's opinion, however, "there is no reason why from two years on, children should not have meat at least twice a day."

### Not Always Comfortable

#### French Beds Usually Hard And German Ones Very Short

Consider that about one-third of our lives are spent in bed; it is not wonderful that much trouble and expense are devoted to our sleeping places. In this country the healthy mattress has almost ousted the feather bed. French beds are noted for their hardness and German beds are very short. Most Norwegian beds made to pull from recesses. The hammock rules in South and Central America. The Indians of Guinea plait most beautiful hammocks of grass. The Japanese lie upon matting laid on the floor, with a stiff, uncomfortable wooden headrest—a bed of torture to travellers from other lands. The Chinese use low bedsides, often elaborately carved. Their only mattresses and coverlets are made of matting.

### Guard against Rickets with Cod Liver Oil

## PLUS ADDED DIGESTIBILITY

All babies need the anti-rachitic value of Vitamin A and D, found in pure cod liver oil. Scott's Cod Liver Oil is rich in both Vitamins, PLUS the digestibility of the oil and its Emulsification. PLUS the body-building aid of hypo-phosphites of lime and soda. Pleasant to take, Scott's Emulsion is tremendously more effective.

# SCOTT'S EMULSION

THE COD LIVER OIL WITH THE PLUS VALUE  
For Sale by Your Druggist

The total value of Canadian field crops harvested in 1934 is now estimated at \$44,974,600 compared with a revised estimate of \$45,594,000 for 1933. This increase of \$91,376,600 is due mainly to higher unit prices.

Don't know just why they changed the name, but the Y.W.C.A. was originally known as the Ladies' Christian Association and had its beginning back in 1858 in New York.

**T**HIS Great Canadian Illustrated Weekly—produced in Canada by Canadians—for Canadians—one of the world's greatest newspapers—is as Canadian as Hockey and quite as vigorous—with news of the world, stories and articles by world-famed writers and artists and by Canadians of international reputation. #### Not Obsolete Yet

Fountain Pen Fifty Years Old Still Popular

One of the pioneers of the fountain pen is dead at his home in Bloomsburg, Pa. The Associated Press dispatch says that Paul E. Wilt put his pen on the market in 1885. He would therefore have lived to see the semi-centennial of his venture. The reference book says that the L. E. Waterman patent was issued in 1884. Why didn't the pen manufacturers making as big a noise as the typewriter people did a few years ago?

Here is another warning for the experts in trends and dooms. They are always pronouncing judgments of decay, obsolescence and extinction on machines, ideas, social systems. They take their stand on the inevitable march of events. But how fast does the inevitable move? The type-writing machine was invented about 1878. The fountain pen came out half a dozen years later. One would have said it was doomed from the start.

What chance would a manual writing instrument have against a writing machine? To-day the school children do their lessons on typewriters; but, after all, to-day, is fifty years since the fountain pen arrived. Even to-day one may find a manufacturer or a retailer here and there willing to sell you a fountain pen.

About machines and social systems, it may be said that news of death is often greatly exaggerated.—New York Times.

### Little Helps For This Week

"To be spiritually minded is life and peace." Romans 8:6.

Stilled now, be every anxious See God's great goodness everywhere.

Leave all to Him in perfect rest. He will do all things for the best.

Why don't the pen manufacturers making as big a noise as the typewriter people did a few years ago?

We should all endeavor for a calmer spirit, that we may the better serve God in praying to Him and praising Him; and serve one another in love, that we may be fitted to do and receive good; that we may make our passage to heaven more easy and cheerful. So much as we are quiet and cheerful on good ground, so much we live and are, as it were, in heaven.

Possess yourself as much as you possibly can in peace; not by any effort, but by letting all things fall to the ground which trouble or excite you. This is no work, but just settling down a fluid to settle that has become turbid through agitation.

#### U.S. Population

Census bureau figures disclosed that the population of the United States has jumped up nearly 20,000,000 since 1930. The latest census estimate places the population at 141,574,000 people, compared with the 1930 census of 122,775,046.

Canadian hay as required in Belgium must be No. 1 extra, mixed, 75 per cent. timothy and 25 per cent. clover. Hay enters Belgian free.

### Lifeboats For New Liner

#### Large Ever Constructed Are Ordered For "Queen Mary"

Thousands of pounds are involved in the contract for 24 fireproof and unsinkable lifeboats with Diesel engines, the entire lifeboat equipment of the Cunard White Star liner Queen Mary, which has been placed with Messrs. Hugh McLean, boat-builders, Govan, Glasgow, according to the Liverpool Echo.

The outfit of each boat will be as follows: 2 lbs. biscuits, one quart of water, 1 lb. the condensed milk, one tin of red distress flares, one oil lamp to burn eight hours, one tin of oil for same, one box of matches in soldered tin, one gallon tin of fish oil (for calming rough waters), one canvas seacock, drag chain and tripping line, two sets of oars, compass (magnetic type with lamp), one set of oars and two spars, one and a half sets of rowlocks, one bucket, one bailer, one mooring rope or painter and two bilge pumps.

The lifeboats will be the largest ever constructed in Great Britain and will embody the result of careful experiments conducted by experts of the Cunard company in consultation with engineers and naval architects over a period of three years.

The carrying capacity will be 145 persons each, as compared with the largest lifeboats on the Aquitania, which carry only 68 persons.

They will be unsinkable, being fitted with copper buoyancy chambers, easily removable for a periodical examination and of such a capacity to float all passengers combined with the weight of the boat, its engine, its fittings plus an additional safety margin of 10 per cent buoyancy.

In a fully flooded condition the Diesel motor can be started up and will run until the fuel oil is exhausted. Specifically indicated, the Diesel motors will be able to start in the most extreme conditions of cold.

To ensure perfect tuning of carefully arranged installations, the motors to be started up with the lifeboats remaining in the davits. A flat side dock level with the top of the gunwale will permit rapid embarkation and access. The lifeboats will be lowered from the davits by wire rope falls. They will be fitted with Ferguson's patent boat's releasing gear, by means of which a handle aft can be pulled to let go both ends simultaneously at the opposite moment.

#### Had Reason To Dance

The music of a duck which could dance to music spread through Sydney, Australia. Large crowds who watched it jog up and down on an upturned tin apparently in time to the music of a tin whistle played by its owner, gave generously when a hat was passed. Plainclothes police found the tin on which the duck danced was uncomfortably hot. Below it was a candle.

Men of learning knew that the earth was round many centuries before Columbus was born.

### FALSE TEETH

#### DR. WERNET'S POWDER HOLDS FAST

When this dentist's grand preparation holds plates firmly, snugly and comfortably in place, it has the largest sale in the world—over 100,000 boxes a year—make your dentist prescribe it—it's inexpensive.

## Contract awarded to lowest bidder

When a corporation wishes to build a factory . . . When a town constructs new cement sidewalks . . . whenever large works are planned, the first step is almost invariably a request for bids on the work. This practice of competitive bidding has saved millions of dollars. It assures the town or corporation of getting the best value for every dollar spent.

The same system can be applied to your own buying. And you can save a proportionate amount of money. How? Simply by consulting the advertising pages of the paper!

When you find yourself in need of anything—don't rush out and buy the first one offered you. Exercise the power of selection that the advertisements give you. Read about them—what they are like and will do, who makes it and what it costs. Then, when you find the one that best suits your pocket book and needs, buy it! In this way you'll be spending your money wisely. You'll know what you're getting and how much it costs—before you buy it.

Every advertisement is the bid of  
some business firm for your trade; consider  
them carefully before buying

## Town & District

The Social Credit Group and the Young Peoples' Study Club will have a social evening next Monday, March 4th, commencing at 8 o'clock in the Oddfellows hall. There will be a program of music and short speeches at the close of which refreshments will be served. Everybody welcome.

The local campaign committee for the Welcome Baden-Powell Fund and the local Boy Scout Association are getting good results from their canvass for funds. It will be the end of the week before the three canvassing committees will have their lists complete. The allocation for Gleichen will likely be over subscribed.

Mrs. Beattie of Cluny spent last week in town visiting Mrs. V. M. Gilbert.

Mrs. Bailey of Cluny spent a few days last week visiting Mrs. L. Jeffers.

Chris Bartach who is now living in the Peace River country spent a short time in town Saturday visiting old friends. Those who were talking with him state Mr. Bartach looks to be in excellent health.

Cluny hospital started Monday with several links entered from Gleichen.

The Old Sun School Scout hockey team played Rockyford Scout team Saturday afternoon. The Gleichen Scouts winning the game 7-3. Referee, Rev. J. House.

Miss L. Hunter won the pig at the Craignanter Softball Girls Tombola.

Miss E. McNaughan and Miss H. McLeod, of the Blackfoot hospital entertained at bridge last week.

Rev. V. M. Gilbert spent last week in Calgary attending Conference.

Friday night Brooks played the Gunners here in a snowstorm for the Morgan cup. Four periods of 15 minutes each were played and resulted in a 4-3 win for Gleichen. The Gunners have since won the round 15-9. It took us as long to clear the snow off the ice as it did to play a period. The referee became looking after the cash that rolled in the wicket at the arena is director of the night, so while the snow fell on the spectators and a bunch shoveled the snow off the ice, he had the rink play "In the Good Old Summertime." The game was a poor exhibition of hockey. The drifting snow prevented good combination plays and held back the puck to such an extent that it was laughable.

Through an oversight last week we failed to announce the winners of the telephone bridge. They were: first Mrs. Bell and Mr. S. Gutratz; Consolidation, Mrs. P. Downey and Mr. L. Michael. Play took place in the following homes: Mrs. Lewis, Mrs. Michael, Mrs. H. Hunter and Mrs. Black.

Alberta exported last year a total of 26,735 cases of eggs, according to figures from the provincial poultry branch. Imports of eggs to the province totalled only 676 cases, all from B.C. Exports of poultry were 67 cars of turkeys and 20 cars of other poultry, a total of 1,800,000 pounds.

### MUSINGS OF A WANDERER

By "Happy" the Boomer  
A SHOE SHINE WANTED

The summer sun was just peeping over the hills of Alberta at Medicine Hat. A manifest freight on the Canadian Pacific was about to pull out for Swift Current, Saskatchewan, 145 miles east. As the train "highballled" out I grabbed the steps of a gondola, containing a car. At Dunsmore Junction, a few miles east, the "helper" was cut off and returned down the heavy grade to the "flat."

In a few minutes the train was on its way to Medicine Hat, the next stop. As the train passed down at the water tank I noticed the bellman uniform of a "Mountie" alongside the car. Taking off my coat, I went over the end of the car and started to "test the air" by pulling the air-valve handles.

"Good morning, Brakie," said the Mountie. "Good morning," I replied, and went along testing the air. "Have you any 'boobs' on your train to-day?" he asked. "Not a one," said I. "Well," he commanded, "if we don't get some 'boobs' pretty soon, we'll have to shave our own shoes."

The engine had taken water and had back down to the train. The train pulled out and as it passed the depot, I waved a fond farewell to the gong in the mountie uniform. I arrived in Swift Current a few hours later.

## Feathered Stowaway

A pigeon that found itself "in the soup" was taken care of by a butcher, but will never end up in a pie, made the front page a few days ago when the Canadian Pacific liner "Empress of Britain" arrived at Quebec from Southampton with a homing pigeon on the list as a stowaway. The pigeon, eying the camera with a querulous expression, sat on the deck of the Empress in whose keeping all travelling pets are placed.

Battered by storms after fighting heavy head winds for a number of hours, the pigeon, which had been released some 250 miles west of Lake Huron, had been flying for 12 hours in a futile effort to

get on the transatlantic liner.

It carried a message from Capt. Latte to the liner, in authentication of the strange story it will have to tell.

We read that to be fashionable  
girls must be plumper. But surely nothing  
goes to extremes.
